Aveiro

Elev: 0 ft	40°39'30"**N** 8°42'00"**W**

Radial **186**, **37NM** from **PRT**, **114.10** (PORTO)

VHF/AM	VHF/FM
(FIS) **LISBOA MIL**: 130.905 MHz **PORTO APP**: 120.910 MHz **OVAR APP**: 118.600 MHz (PROCIV) **CDOS**: 122.830 MHz	Maritime Authority: **Polimar** Channel 11 (156.550 MHz) Firemen: **COPAR** Channel 4 (152.625 MHz)

Excellent in various points.
Muddy banks, but good depth in the channel centerlines.
Wind normally from the **NW**.

Some traffic between the harbour and the port, but the canal are wide enough as to not create conflict.

Maritime Authority will usually assign a scooping line away from the docks and main stream traffic. **Do not scoop outside the assigned scooping point.**

Usual authorised spot is the São Jacinto channel, close to the São Jacinto AB.

The AB has little or no air traffic during the summer. As a parachute training base, it seems to be activated only during exercises and/or boot camp courses.
Contact military frequencies for information.
