

CLASS A

Vilarinho das Furnas 27

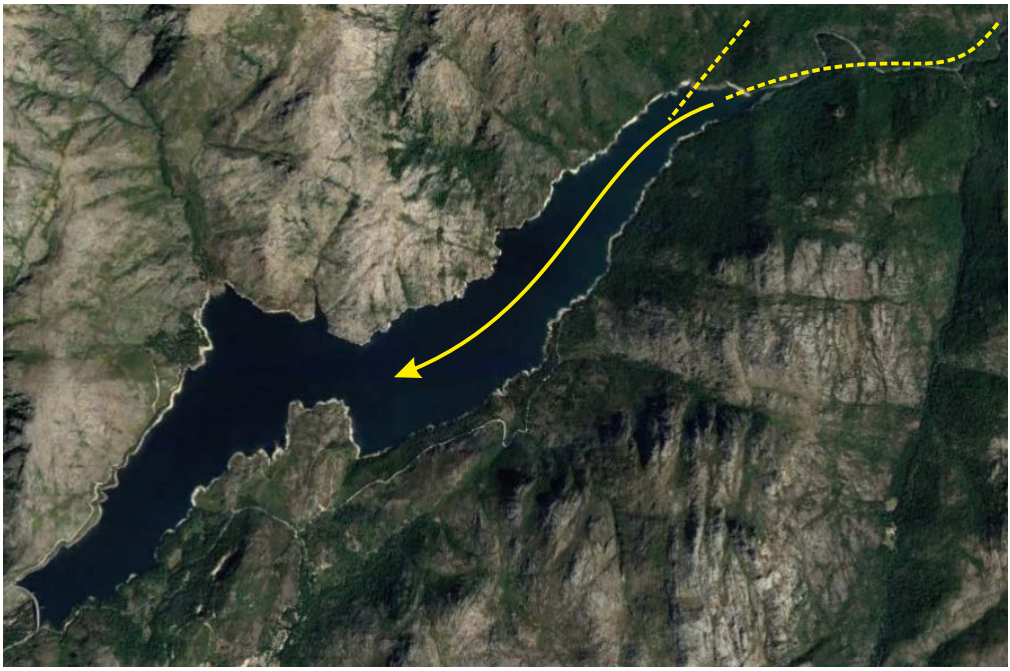

Terras de Bouro
Braga

Elev: 1840 ft | 41°46'30"**N** 8°11'00"**W**

Radial **040**, **38NM** from **PRT**, **114.100** (PORTO)

VHF/AM
(FIS) **LISBOA MIL**: 130.905 MHz
PORTO APP: 120.910 MHz
BRAGA RADIO: 122.005 MHz
(PROCIV) **CDOS**: 124.955 MHz

VHF/FM
Firemen: **COPAR**
Channel 4 (152.625 MHz)

Limited to a **NE** to **SW** direction for the CI215.
Approach is difficult, and descent is best carried out inside the narrow valley of the Homem river, to the **NE**. The turn to final should coincide with the adequate height for the intended TDP.
Another possibility is to follow the shallow talweg further **N**, in a direct approach; this can lead to a longer flare before touchdown. Both cases are hard on piston engines, due to cooling
Beware of reduced performance due to elevation in high temperatures,
Exit to **SW** is clear and to lower terrain, although the aircraft should be airborne well before the **Z** curve in the midlle, which can prove difficult to negociate while planning on the step.

Due to the high elevations around it, the whole area can become quite turbulent in windy days.
Winds are mostly variable, but predominate from the **E.**
Watch out for spanish airtanker activity; try to contact them in **VHF/AM 129,850 Mhz.**

HIGH TERRAIN ALL AROUND. BEWARE OF NARROW, CLOSED VALLEYS
