Great Scooping spot with an extension of around 7 Kms.
There are several adequate scooping points from the Town of Pinhão to the Régua Dam.
Deep valley, with good approaches. Climb out following the river.

Beware of river traffic.
Beware of power lines that seem to proliferate from one season to the other. This is especially true in the valleys prependicular to the river, which we usually use for water approach or climb out.

Predominant winds from the **W** quadrants, usually channeled by the river valley.
